

Update - November 2017

The boat park is currently closed pending essential ground stability works being undertaken.

The Town Council approved the necessary funding for these works at the Extraordinary Council Meeting held on 18th October 2017, and the official tender process for the re-stabilisation of the boat park has now commenced.

This is a major project for the Town Council and the capital cost is significant. The Town Council is therefore hopeful that a contractor will be appointed before the end of the calendar year. Until the tender process is complete we will not know when the selected contractor will be able to undertake the works, or how long the works will take. However, we are extremely keen to open the boat park for the 2018-19 season, and we will keep you up to date as more information is forthcoming.
