1. Introduction

The Chartered Institute of Public Finance and Accountancy's Guidance for Smaller Public Organisations on the Application of the CIPFA Code of Practice for Treasury Management in the Public Services: Code of Practice 2011 Edition (the CIPFA Code) requires local authorities to determine the Treasury Management Strategy Statement (TMSS) on an annual basis.

In addition, the Department for Communities and Local Government (CLG) issued revised *Guidance on Local Authority Investments* in March 2010 that requires the Authority to approve an investment strategy before the start of each financial year.

This report fulfils the Authority's obligation to have regard to both the CIPFA Code and the CLG Guidance.

The Authority has invested substantial sums of money and is therefore exposed to financial risks including the loss of invested funds and the revenue effect of changing interest rates. The successful identification, monitoring and control of risk are therefore central to the Authority's treasury management strategy.

2. External Context

Economic background: There is momentum in the UK economy, with a continued period of growth through domestically-driven activity and strong household consumption. There are signs that growth is becoming more balanced. The greater contribution from business investment should support continued, albeit slower, expansion of GDP. However, inflationary pressure is benign and is likely to remain low in the short-term. There have been large falls in unemployment but levels of part-time working, self-employment and underemployment are significant and nominal earnings growth remains weak and below inflation.

The MPC's focus is on both the degree of spare capacity in the economy and the rate at which this will be used up, factors prompting some debate on the Committee. Despite two MPC members having voted for a 0.25% increase in rates at each of the meetings from August 2014 onwards, some Committee members have become more concerned that the economic outlook is less optimistic than at the time of the August *Inflation Report*.

Credit outlook: The transposition of two European Union directives into UK legislation in the coming months will place the burden of rescuing failing EU banks disproportionately onto unsecured local authority investors. The *Bank Recovery and Resolution Directive* promotes the interests of individual and small businesses covered by the Financial Services Compensation Scheme and similar European schemes, while the recast *Deposit Guarantee Schemes Directive* includes large companies into these schemes. The combined effect of these two changes is to leave public authorities and financial organisations (including pension funds) as the only senior creditors likely to incur losses in a failing bank after July 2015.

The continued global economic recovery has led to a general improvement in credit conditions since last year. This is evidenced by a fall in the credit default swap spreads of banks and companies around the world. However, due to the above legislative changes, **the credit risk associated with making unsecured bank deposits will increase** relative to the risk of other investment options available to the Authority.

Interest rate forecast: The Authority’s treasury management advisor Arlingclose forecasts the first rise in official interest rates in August 2015 and a gradual pace of increases thereafter, with the average for 2015/16 being around 0.75%. Arlingclose believes the normalised level of the Bank Rate post-crisis to range between 2.5% and 3.5%. The risk to the upside (i.e. interest rates being higher) is weighted more towards the end of the forecast horizon. On the downside, Eurozone weakness and the threat of deflation have increased the risks to the durability of UK growth. If the negative indicators from the Eurozone become more entrenched, the Bank of England will likely defer rate rises to later in the year. Arlingclose projects gilt yields on an upward path in the medium term, taking the forecast average 10 year PWLB loan rate for 2015/16 to 3.40%.

A more detailed economic and interest rate forecast provided by Arlingclose is attached at *Appendix A*.

For the purpose of setting the budget, it has been assumed that new investments will be made at an average rate of 0.85%.

3. Local Context

The Authority currently has £5.76m of investments. This is set out in further detail at *Appendix B*. Forecast changes in these sums are shown in the balance sheet analysis in table 1 below.

Table 1: Balance Sheet Summary and Forecast

Gross to Net Borrowing Requirement (Projections)					
	Actual 31-Mar-14 £	Estimated 31-Mar-15 £	Estimated 31-Mar-16 £	Estimated 31-Mar-17 £	Estimated 31-Mar-18 £
External Borrowing & Other Long Term Liabilities (at Nominal Value)	0	0	0	0	0
Balances & Reserves (incl. £2.5m LAMIT)	7,348,984	5,195,647	5,225,928	4,248,250	4,651,985
(Net Borrowing Requirement)/ Investment Capacity	7,348,984	5,195,647	5,225,928	4,248,250	4,651,985

The underlying need to borrow for capital purposes is measured by the Capital Financing Requirement (CFR), while usable reserves and working capital are the underlying resources available for investment.

The Authority is currently debt free and its capital expenditure plans do not currently imply any need to borrow over the forecast period. Investments are forecast to fall to £4.67m in 2017/18 as capital receipts and reserves are used to finance capital expenditure.

4. Borrowing Strategy

Local Council borrowing is governed by Schedule 1 to the Local Government Act 2003. Parish & Town Councils in England have to apply and receive approval from the Secretary of State before taking up any borrowing. Certain temporary borrowings do not require borrowing approval. The amount that an individual town council will be authorised to borrow will normally be limited to a maximum of £500,000 in any single financial year. Borrowing may only be entered into for a purpose that would be capital expenditure as defined in section 16 of the Local Government Act 2003 and the decision to borrow must be made by full council.

As indicated in Table 1, the Authority is currently debt free and its capital expenditure plans do not currently imply any external borrowing requirement in 2015/16.

The Council's requirement to borrow will be reviewed annually as part of the Council's TMSS and assessed in conjunction with the Council's capital programme. Any potential future borrowing will be assessed so as to minimise the costs to revenue.

The Responsible Financial Officer may from time to time authorise the use of a temporary bank overdraft facility to facilitate cash flow throughout the financial year.

The Council is likely to only borrow in advance of need if it felt the benefits of borrowing at interest rates now compared to where they are expected to be in the future, outweighs the current cost and risks associated with investing the proceeds until the borrowing was actually required. The Council recognises that the borrowing of money purely to invest is ultra vires and the Council will not engage in this activity.

5. Investment Strategy

The Authority holds significant invested funds, representing income received in advance of expenditure plus balances and reserves held. In the past 12 months, the Authority's investment balance has ranged between £7.68m and £5.76m. The funds that the Council holds for investment purposes is expected to decrease in the forthcoming year due to the financing of the Council's capital programme.

Objectives: Both the CIPFA Code and the CLG Guidance require the Authority to invest its funds prudently, and to have regard to the security and liquidity of its investments before seeking the highest rate of return, or yield. The Authority's objective when investing money is to strike an appropriate balance between risk and return, minimising the risk of incurring losses from defaults and the risk of receiving unsuitably low investment income.

Strategy: Given the increasing risk and continued low returns from short-term unsecured bank investments, the Authority aims to continue to diversify into more secure and/or higher yielding asset classes during 2015/16.

Approved Counterparties: The Authority may invest its surplus funds with any of the counterparty types in table 2 below, subject to the cash limits (per counterparty) and the time limits shown.

Table 2: Approved Investment Counterparties

Credit Rating	Banks Unsecured	Banks Secured	Government	Corporates	Registered Providers
UK Govt	n/a	n/a	£ Unlimited 50 years	n/a	n/a
AAA	£2m 5 years	£2m 20 years	£1m 50 years	£2m 20 years	£1m 20 years
AA+	£2m 5 years	£2m 10 years	£1m 25 years	£2m 10 years	£1m 10 years
AA	£2m 4 years	£2m 5 years	£1m 15 years	£2m 5 years	£1m 10 years
AA-	£2m 3 years	£2m 4 years	£1m 10 years	£2m 4 years	£1m 10 years
A+	£2m 2 years	£2m 3 years	£1m 5 years	£2m 3 years	£0.5m 5 years
A	£2m 13 months	£2m 2 years	£1m 5 years	£2m 2 years	£0.5m 5 years
A-	£2m 6 months	£2m 13 months	£1m 5 years	£2m 13 months	£0.5m 5 years
BBB+	£2m 100 days	£1m 6 months	£0.5m 2 years	£1m 6 months	£0.5m 2 years
BBB or BBB-	£2m next day only	£1m 100 days	n/a	n/a	n/a
None	n/a	n/a	£0.5m 25 years	£50,000 5 years	£0.5m 5 years
Pooled funds	£3m per fund				

Credit Rating: Investment decisions are made by reference to the lowest published long-term credit rating from Fitch, Moody’s or Standard & Poor’s. Where available, the credit rating relevant to the specific investment or class of investment is used, otherwise the counterparty credit rating is used.

Banks Unsecured: Accounts, deposits, certificates of deposit and senior unsecured bonds with banks and building societies, other than multilateral development banks. These investments are subject to the risk of credit loss via a bail-in should the regulator determine that the bank is failing or likely to fail. Unsecured investment with banks rated BBB or BBB- are restricted to overnight deposits at the Authority’s current account bank [Lloyds Bank plc].

Banks Secured: Covered bonds, reverse repurchase agreements and other collateralised arrangements with banks and building societies. These investments are secured on the bank’s assets, which limits the potential losses in the unlikely event of insolvency, and means that they are exempt from bail-in. Where there is no investment specific credit rating, but the collateral upon which the investment is secured has a credit rating, the highest of the collateral credit rating and the counterparty credit rating will be used to determine cash and time limits. The combined secured and unsecured investments in any one bank will not exceed the cash limit for secured investments.

Government: Loans, bonds and bills issued or guaranteed by national governments, regional and local authorities and multilateral development banks. These investments are not subject to bail-in, and there is an insignificant risk of insolvency. Investments with the UK Central Government may be made in unlimited amounts for up to 50 years.

Corporates: Loans, bonds and commercial paper issued by companies other than banks and registered providers. These investments are not subject to bail-in, but are exposed to the risk of the company going insolvent. Loans to unrated companies will only be made as part of a diversified pool in order to spread the risk widely.

Registered Providers: Loans and bonds issued by, guaranteed by or secured on the assets of Registered Providers of Social Housing, formerly known as Housing Associations. These bodies are tightly regulated by the Homes and Communities Agency and, as providers of public services, they retain a high likelihood of receiving government support if needed.

Pooled Funds: Shares in diversified investment vehicles consisting of the any of the above investment types, plus equity shares and property. These funds have the advantage of providing wide diversification of investment risks, coupled with the services of a professional fund manager in return for a fee. Money Market Funds that offer same-day liquidity and aim for a constant net asset value will be used as an alternative to instant access bank accounts, while pooled funds whose value changes with market prices and/or have a notice period will be used for longer investment periods.

Bond, equity and property funds offer enhanced returns over the longer term, but are more volatile in the short term. These allow the Authority to diversify into asset classes other than cash without the need to own and manage the underlying investments. Because these funds have no defined maturity date, but are available for withdrawal after a notice period, their performance and continued suitability in meeting the Authority's investment objectives will be monitored regularly.

Risk Assessment and Credit Ratings: Credit ratings are obtained and monitored by the Authority's treasury advisers, who will notify changes in ratings as they occur. Where an entity has its credit rating downgraded so that it fails to meet the approved investment criteria then:

- no new investments will be made,
- any existing investments that can be recalled or sold at no cost will be, and
- full consideration will be given to the recall or sale of all other existing investments with the affected counterparty.

Where a credit rating agency announces that a credit rating is on review for possible downgrade (also known as "rating watch negative" or "credit watch negative") so that it may fall below the approved rating criteria, then only investments that can be withdrawn on the next working day will be made with that organisation until the outcome of the review is announced. This policy will not apply to negative outlooks, which indicate a long-term direction of travel rather than an imminent change of rating.

Other Information on the Security of Investments: The Authority understands that credit ratings are good, but not perfect, predictors of investment default. Full regard will therefore be given to other available information on the credit quality of the organisations in which it invests, including credit default swap prices, financial statements, information on potential government support and reports in the quality financial press. No investments will be made with an organisation if there are substantive doubts about its credit quality, even though it may meet the credit rating criteria.

When deteriorating financial market conditions affect the creditworthiness of all organisations, as happened in 2008 and 2011, this is not generally reflected in credit ratings, but can be seen in other market measures. In these circumstances, the Authority will restrict its investments to those organisations of higher credit quality and reduce the maximum duration of its investments to maintain the required level of security. The extent of these restrictions will be in line with prevailing financial market conditions. If these restrictions mean that insufficient commercial organisations of high credit quality are available to invest the Authority's cash balances, then the surplus will be deposited with the UK Government, via the Debt Management Office or invested in government treasury bills for example, or with other local authorities. This will cause a reduction in the level of investment income earned, but will protect the principal sum invested.

Specified Investments: The CLG Guidance defines specified investments as those:

- denominated in pound sterling,
- due to be repaid within 12 months of arrangement,
- not defined as capital expenditure by legislation, and
- invested with one of:
 - the UK Government,
 - a UK local authority, parish council or community council, or
 - a body or investment scheme of "high credit quality".

The Authority defines "high credit quality" organisations and securities as those having a credit rating of [A-] or higher that are domiciled in the UK or a foreign country with a sovereign rating of [AA+] or higher. For money market funds and other pooled funds "high credit quality" is defined as those having a credit rating of [A-] or higher.

Non-specified Investments: Any investment not meeting the definition of a specified investment is classed as non-specified. The Authority does not intend to make any investments denominated in foreign currencies, nor any that are defined as capital expenditure by legislation, such as company shares. Non-specified investments will therefore be limited to long-term investments, i.e. those that are due to mature 12 months or longer from the date of arrangement, and investments with bodies and schemes not meeting the definition on high credit quality. Limits on non-specified investments are shown in table 3 below.

Table 3: Non-Specified Investment Limits

	Cash limit
Total long-term investments	£1m
Total investments without credit ratings or rated below [A-]	£2.5m
Total investments with institutions domiciled in foreign countries rated below [AA+]	£1m
Total non-specified investments	£3.5m

Investment Limits: In order to minimise the amount of reserves that would be put at risk in the case of a single default, the maximum that will be lent to any one organisation (other than the UK Government) will be £3million. A group of banks under the same ownership will be treated as a single organisation for limit purposes. Limits will also be placed on fund managers, investments in brokers' nominee accounts, foreign countries and industry sectors as below:

Table 4: Investment Limits

	Cash limit
Any single organisation, except the UK Central Government	£3m each
UK Central Government	unlimited
Any group of organisations under the same ownership	£3m per group
Any group of pooled funds under the same management	£3m per manager
Negotiable instruments held in a broker's nominee account	£1.5m per broker
Foreign countries	£1m per country
Registered Providers	£1m in total
Unsecured investments with Building Societies	£1m in total
Loans to unrated corporates	£0.5m in total
Money Market Funds	£3m in total

Loans to Local Organisations/Community Groups: This strategy does not preclude making loans with local charitable or community organisations. All requests for loans will be judged on an individual basis and with the advice from the Council's treasury advisors.

Liquidity management: The Council has placed an upper limit for principal sums invested for over 12 months by determining that a minimum of £1m should be held in short term investments. Limits on long-term investments are set by reference to the Authority's medium term financial plan and cash flow forecast.

6. Other Items

There are a number of additional items that the Authority is obliged by CIPFA or CLG to include in its Treasury Management Strategy.

Investment Training: The needs of the Authority's treasury management staff for training in investment management are assessed as part of the staff appraisal process, and additionally

when the responsibilities of individual members of staff change. Staff regularly attend training courses, seminars and conferences provided by Arlingclose.

Investment Advisors: The Authority has appointed Arlingclose Limited as treasury management advisors and receives specific advice on investment, debt and capital finance issues. The quality of this service is controlled by monitoring:

- The timeliness of advice
- The returns on investments
- The accuracy of technical advice
- Regular meetings
- Benchmarking
- The quality and content of training courses

The Council recognises that the responsibility for treasury management and investment decisions remain with the Council.

7. Financial Implications

The budget for investment income in 2015/16 is £149,950, based on an average investment portfolio of £5.14 million at an interest rate of 3%. If actual levels of investments, and actual interest rates differ from those forecast, performance against budget will be correspondingly different.

8. Other Options Considered

The CLG Guidance and the CIPFA Code do not prescribe any particular treasury management strategy for local authorities to adopt. The Responsible Financial Officer having consulted with the Council’s treasury advisors believes that the above strategy represents an appropriate balance between risk management and cost effectiveness. Some alternative strategies, with their financial and risk management implications, are listed below.

Alternative	Impact on income and expenditure	Impact on risk management
Invest in a narrower range of counterparties and/or for shorter times	Interest income will be lower	Lower chance of losses from credit related defaults, but any such losses will be greater
Invest in a wider range of counterparties and/or for longer times	Interest income will be higher	Increased risk of losses from credit related defaults, but any such losses will be smaller

Appendix A – Arlingclose Economic & Interest Rate Forecast October 2014

Underlying assumptions:

- The UK economic recovery has continued. Household consumption remains a significant driver, but there are signs that growth is becoming more balanced. The greater contribution from business investment should support continued, albeit slower, expansion of GDP throughout this year.
- We expect consumption growth to slow, given softening housing market activity, the muted outlook for wage growth and slower employment growth. The subdued global environment suggests there is little prospect of significant contribution from external demand.
- Inflationary pressure is currently low and is likely to remain so in the short-term. Despite a correction in the appreciation of sterling against the US dollar, imported inflation remains limited. We expect commodity prices will remain subdued given the weak outlook for global growth.
- The MPC's focus is on both the degree of spare capacity in the economy and the rate at which this will be used up, factors prompting some debate on the Committee.
- Nominal earnings growth remains weak and below inflation, despite large falls in unemployment, which poses a dilemma for the MPC. Our view is that spare capacity remains extensive. The levels of part-time, self-employment and underemployment are significant and indicate capacity within the employed workforce, in addition to the still large unemployed pool. Productivity growth can therefore remain weak in the short term without creating undue inflationary pressure.
- However, we also expect employment growth to slow as economic growth decelerates. This is likely to boost productivity, which will bear down on unit labour costs and inflationary pressure.
- In addition to the lack of wage and inflationary pressures, policymakers are evidently concerned about the bleak prospects for the Eurozone. These factors will maintain the dovish stance of the MPC in the medium term.
- The continuing repair of public and private sector balance sheets leave them sensitive to higher interest rates. The MPC clearly believes the appropriate level for Bank Rate for the post-crisis UK economy is significantly lower than the previous norm. We would suggest this is between 2.5 and 3.5%.
- While the ECB is likely to introduce outright QE, fears for the Eurozone are likely to maintain a safe haven bid for UK government debt, keeping gilt yields artificially low in the short term.
- The probability of potential upside risks crystallising have waned a little over the past two months. The primary upside risk is a swifter recovery in the Eurozone.

Forecast:

- Arlingclose continues to forecast the first rise in official interest rates in Q3 2015; general market sentiment is now close to this forecast. There is momentum in the

economy, but inflationary pressure is benign and external risks have increased, reducing the likelihood of immediate monetary tightening.

- We project a slow rise in Bank Rate. The pace of interest rate rises will be gradual and the extent of rises limited; we believe the normalised level of Bank Rate post-crisis to range between 2.5% and 3.5%.
- The short run path for gilt yields is flatter due to the deteriorating Eurozone situation. We project gilt yields on an upward path in the medium term.

Glossary of Terms

Balances and Reserves	Accumulated sums that are maintained either earmarked for specific future costs or commitments or generally held to meet unforeseen or emergency expenditure.
Bank Rate	The official interest rate set by the Bank of England's Monetary Policy Committee and what is generally termed at the "base rate". This rate is also referred to as the "repo rate".
Bond	A certificate of debt issued by a company, government, or other institution. The bond holder receives interest at a rate stated at the time of issue of the bond. The price of a bond may vary during its life.
Capital Expenditure	Expenditure on the acquisition, creation or enhancement of capital assets
Capital Financing Requirement (CFR)	The Council's underlying need to borrow for capital purposes representing the cumulative capital expenditure of the local authority that has not been financed.
Capital growth	Increase in the value of the asset (in the context of a collective investment scheme, it will be the increase in the unit price of the fund)
Capital receipts	Money obtained on the sale of a capital asset.
Credit Rating	Formal opinion by a registered rating agency of a counterparty's future ability to meet its financial liabilities; these are opinions only and not guarantees.
Collective Investment Schemes	Funds in which several investors collectively hold units or shares. The assets in the fund are not held directly by each investor, but as part of a pool (hence these funds are also referred to as "Pooled Funds"). Unit Trusts and Open-Ended Investment Companies are types of collective investment schemes / pooled funds.
Corporate Bonds	Corporate bonds are bonds issued by companies. The term is often used to cover all bonds other than those issued by governments in their own currencies and includes issues by companies, supranational organisations and government agencies.
Corporate Bond Funds	Investing predominantly in bonds issued by companies and supranational organisations.

CPI	Consumer Price Index. (This measure is used as the Bank of England's inflation target.)
Floating Rate Notes	A bond issued by a company where the interest rate paid on the bond changes at set intervals The rate of interest is linked to LIBOR and may therefore increase or decrease at each rate setting.
Gilt	A fixed rate security issued as debt and repaid at a future date.
IFRS	International Financial Reporting Standards
Money Market Funds (MMF)	Pooled funds which invest in a range of short term assets providing high credit quality and high liquidity.
Minimum Revenue Provision	An annual provision that the Authority is statutorily required to set aside and charge to the Revenue Account for the repayment of debt associated with expenditure incurred on capital assets
Non-Specified Investments	Term used in the Communities and Local Government Guidance and Welsh Assembly Guidance for Local Authority Investments. It includes any investment for periods greater than one year or those with bodies that do not have a high credit rating, use of which must be justified.
Pooled funds	See Collective Investment Schemes (above)
Prudential Code	Developed by CIPFA as a professional code of practice to support local authority capital investment planning within a clear, affordable, prudent and sustainable framework and in accordance with good professional practice
Prudential Indicators	Indicators determined by the local authority to define its capital expenditure and asset management framework. They are designed to support and record local decision making in a manner that is publicly accountable; they are not intended to be comparative performance indicators
PWLB	Public Works Loans Board. It is a statutory body operating within the United Kingdom Debt Management Office, an Executive Agency of HM Treasury. The PWLB's function is to lend money from the National Loans Fund to local authorities and other

	prescribed bodies, and to collect the repayments.
Revenue Expenditure	Expenditure to meet the continuing cost of delivery of services including salaries and wages, the purchase of materials and capital financing charges
SI (Statutory Instrument)	The principal form in which delegated or secondary legislation is made in Great Britain.
Specified Investments	Term used in the CLG Guidance and Welsh Assembly Guidance for Local Authority Investments. Investments that offer high security and high liquidity, in sterling and for no more than 1 year. UK government, local authorities and bodies that have a high credit rating.
Supranational Bonds	Instruments issued by supranational organisations created by governments through international treaties (often called multilateral development banks). The bonds carry an AAA rating in their own right. Examples of supranational organisations are the European Investment Bank, the International Bank for Reconstruction and Development.
Supported Capital Expenditure	The financing element of Capital expenditure that is grant funded by Central Government
Treasury Management Code	CIPFA's Code of Practice for Treasury Management in the Public Services
Temporary Borrowing	Borrowing to cover peaks and troughs of cash flow, not to fund spending.
Term Deposits	Deposits of cash with terms attached relating to maturity and rate of return
Unsupported Capital Expenditure	The financing of Capital expenditure is financed internally through the revenue budget
